politics & ethics

Our Oslo package offers the opportunity to explore the politics and ethics that have shaped twentieth century history. The city offers a wide variety of cultural attractions which can stimulate and challenge young minds.

what will students do?

Students will have the opportunity to get involved in ethical workshops at the Nobel Peace Centre, design their own robot in the Museum of Technology, make their own TV shows at the Television museum and explore cultural diversity at the Inter Cultural Museum.

what will students learn?

Students will learn to discuss ethical diversity and explore philosophical ideas which apply to people across the world.

They will explore how history shapes our future as a species and how our own technological advances will affect us in the years to come.

educational highlights

- Workshops with experts at the Nobel Peace Centre
- Build a robot at the Museum of Technology

cultural highlights

- A day trip to TusenFryd Amusement Park which hosts Europe's first 5D attraction
- Experience the making of TV Shows & Commercials at the NRK interactive centre

what is included in the package?

- Airport transfer
- Accommodation (various standards available)
- All internal transport
- All entrance fees for listed attractions and activities
